

VidyoRouter™

Scalable multipoint video conferencing

VidyoRouter™ is an essential component of the VidyoConferencing™ infrastructure. VidyoRouter uses our patented dynamic video adaptation technology to perform transcode-free packet switching over common IP networks. The result is high-quality multipoint video conferencing that is dynamically optimized for each endpoint, unencumbered by delay and free from broken images. Dramatically more efficient than legacy

MCU equipment, each VidyoRouter can support up to 100 simultaneous HD connections; to increase capacity, simply deploy a VidyoRouter XL (up to 150 HD connections), or additional physical or virtual instances of VidyoRouter anywhere in the network. This smarter infrastructure improves the overall video conferencing experience and reduces the cost of ownership, making for effective and affordable large-scale deployments.

Key Features

Quality and Performance

- Dynamic adaption to both degradation and recovery of each participant's network link
- Supports native rate and resolution matching per endpoint, up to 4K UHD resolution
- Sustains conferences even during periods of high packet loss (up to 20 percent)
- Delivers HD quality over low-bandwidth connections (as low as 512 kbps)
- Imperceptible latency of less than 20 ms
- Supports Multipoint Content, where multiple participants share content at the same time
- Secured signaling and media using TLS and SRTP with FIPS 140-2 compliance

Deployment Flexibility

- Available as a physical or a virtual appliance
- Extends system capacity with additional networked VidyoRouter instances
- Supports distributed network deployment models for bandwidth savings through traffic localization and simplified firewall traversal
- Supports all types of endpoints, including room-based, desktop and mobile devices
- Interoperates with legacy systems via the VidyoGateway™ appliance or the VidyoWay™ interconnectivity service

Low Cost of Ownership

- Extremely efficient for large scale deployments
- Small footprint: a 1U physical appliance supports up to 100 HD connections...and up to 150 on VidyoRouter XL
- Cascades without transcoding to host very large conferences with hundreds of participants
- Maximizes asset utilization with "follow-the-sun" floating capacity licenses
- Reliable performance on general-purpose IP networks extends reach to remote and mobile participants, and eliminates the need for expensive QoS-enhanced links
- Central reporting on utilization and conference details with the free VidyoDashboard™ virtual appliance

VidyoRouter Virtual Edition (VE)

- Same performance and capabilities as the physical VidyoRouter appliance, verified by VMware®
- Easy to deploy, manage, and scale
- Available in two capacities: VidyoRouter VE 100 and VidyoRouter VE 25
- Up to 12X more resource-efficient than the typical soft or virtualized MCU
- Certified "VMware Ready"
