

# Vidyo for Special Education

## What are Your Needs?

- Are you able to provide support services needed by special education students and their families?
- Would you like to enhance current services by adding out-of-area experts and specialists?
- Do you need to provide improved communication around IEPs?
- Do you need to make more professional development opportunities available to your educators?

Special Education serves students with learning and communication challenges, emotional and behavioral disorders, physical disabilities and developmental disorders. Individualized Education Programs focus on teaching methods, adapted equipment and materials, accessible settings and more. The goal is for students to achieve a higher level of personal self-sufficiency and success in school and community than would be possible if the student were only given access to a typical classroom education.

### At Issue

### The Vidyo Solution

**The need to plan for and provide appropriate individual education programs (IEPs) for special need students**

Vidyo supports increased and improved communication around IEPs by connecting families, educational professionals and specialists utilizing interactive video conferencing.

**Integrating family services with educational services as early as possible**

Vidyo can enhance curriculum specific to special needs students. A virtual fieldtrip to a museum, historical site, or other digital content provider is only a mouse-click away.

**The need to accommodate varied approaches to teaching, technology use and education settings**

Vidyo connects special needs students with assessors and education specialists who can identify specific needs and coordinate the proper delivery of services.

**The need for support services provided directly to special needs students and their families**

Vidyo can be used to create collaborative support groups across a campus, district, region or state. There's no need for special-purpose equipment, meeting rooms or IT support because Vidyo supports high quality video conferencing on everyday desktop, mobile and room-based devices over a simple internet connection.

**The need to provide effective professional development for teachers, administrators and others**

Education professionals can use Vidyo to share best practices, access professional development, connect with experts and build mentoring teams.
