

Vidyo for Emergency Response

What are Your Needs?

- Are you able to connect your response teams to build, review and assess emergency response plans?
- Can you conduct training in collaboration with all necessary agencies?
- Are you able to bring in expert consultants to aid in your training and planning?
- How easily can you connect responders so they can see and hear each other and share data?

When a natural or manmade disaster strikes, a coordinated and comprehensive response is critical to saving lives and protecting citizens. Disaster response requires extensive planning and training, expert triage, real-time assessment and interoperable communications. All responding agencies must be able to communicate and coordinate services quickly and effectively in order to protect the community and its citizens.

At Issue

The Vidyo Solution

The need for planning that includes all response and recovery agencies and organizations

Use Vidyo to connect all agencies in the planning process and reduce logistics and travel burdens while enabling more frequent meetings with increased attendance. With Vidyo, collaborating agencies can share relevant data in real-time.

The need for frequent and consistent inter-agency training

Vidyo provides a platform for conducting training that brings all responders together without having to leave their home base of operations. Teams can participate in regular training, with access to other emergency response experts.

The need for responders to share data in real-time

Training exercises can be recorded and evaluated for effectiveness and competencies. Vidyo connects voice, video and data (multiple devices and locations) allowing for real-time assessment and evaluation even in remote areas.

The need for coordinated services in the response and recovery phases of a disaster

Agencies and experts can provide remote support from any location, increasing the ability to coordinate vital emergency services and respond quickly and effectively.
